

Above: the sole Centurion gun tank at the show, driven by ex-tank man Melvyn Cordwell.

Left: the NLBA always try to put on a display for the crowds and this year founder member Paul 'Carts' Cartwright got a shock while driving his Mondeo in the arena, when a CET slammed into the rear...

Below: there was a time that the Combat Engineer Tractor was a rare sight at a show but now they seem to be everywhere! At this year's War & Peace show I counted at least four vehicles, three of which were owned privately.

Above: ...but the CET hadn't finished with the Carts, and having taken a dislike to the Mondeo proceeded to crush it in true War & Peace style. A little later a Centurion ARV joined in the fun too!
